

Video Tag in HTML

The `<video>` tag in HTML is used to embed video content in a document. It supports various attributes to control video playback, such as *controls*, *autoplay*, *loop*, and more.

```
<video width="320" height="240" controls>
  <source src="movie.mp4" type="video/mp4">
  <source src="movie.ogg" type="video/ogg">
  Your browser does not support the video tag
</video>
```

Attributes

- **controls**: Displays video controls like play/pause buttons.
- **autoplay**: Automatically starts playing the video as soon as it can do so without stopping.
- **loop**: Makes the video start over again, every time it is finished.
- **muted**: Mutes the audio by default.

- **poster:** Specifies an image to be shown while the video is downloading or until the user hits the play button.
- **preload:** Provides a hint to the browser about what the author thinks will lead to the best user experience regarding what content is loaded before the video is played. Values can be *none*, *metadata*, or *auto*.

Multiple Sources

```
<video controls>
  <source src="movie.mp4" type="video/mp4">
  <source src="movie.webm" type="video/webm">
  Your browser does not support the video tag
</video>
```

Accessibility

It's important to provide captions and transcripts for videos to make them accessible to all users. This can be done using the *<track> element with WebVTT files*.

```
<video controls>
  <source src="movie.mp4" type="video/mp4">
  <track kind="captions" src="captions.vtt" srclang="en" l
abel="English">
</video>
```

example :

```
<!-- Using multiple sources as fallbacks for a video tag -->
<!-- 'Elephants Dream' by Orange Open Movie Project Studio, l
icensed under CC-3.0, hosted by archive.org -->
```

```

<!-- Poster hosted by Wikimedia -->

<video
  width="620"
  controls
  poster="https://upload.wikimedia.org/wikipedia/commons/e/e8/Elephants_Dream_s5_both.jpg">
  <source
    src="https://archive.org/download/ElephantsDream/ed_hd.avi"
    type="video/avi" />
  <source
    src="https://archive.org/download/ElephantsDream/ed_1024_512kb.mp4"
    type="video/mp4" />

  Sorry, your browser doesn't support embedded videos, but don't worry, you can
  <a
    href="https://archive.org/download/ElephantsDream/ed_1024_512kb.mp4"
    download="ed_1024_512kb.mp4">
    download the MP4
  </a>
  and watch it with your favorite video player!
</video>

```

Task :

1. download any video
2. create folder
3. create html css and js file and linkd all file
4. perform above steps
